Actuators and
Engines

EXHIBITOR REVIEWS

This is our first time here – we decided to introduce ourselves. We've already reached several agreements and met many interesting companies that are interested in our services. And I'm sure we'll be able to build strong cooperation with them in the future. We are pleased with everything and will continue to take part..

**Aleksey Shurchalin, Head of the Energy Department
«EnergoFront»**

Once again, the exhibition has confirmed its status as an effective platform for dialogue with the market. Our stand was visited by hundreds of specialists from various industrial sectors. For us, it was important not only to showcase our products but also to speak with customers in person and understand their current needs and requirements. The feedback we received is extremely valuable for further developing our product range and services.

**The company's CEO, Aleksey Shabanov
Bastion Trading Company
(Bastion TC)**

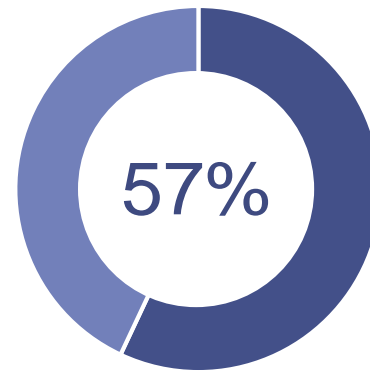

Thanks to your exhibition, we're in the spotlight. We've gained many new contacts. Among the visitors were a large number of end users and design engineers. We haven't regretted being here for a single moment. We're planning to come back.

**Igor Khakhalev, Head of the Commercial Department
The Sary Oskol valve manufacturer Avangard**
